American Journal of Physiology:
Gastrointestinal and Liver Physiology

No. 1. JULY 1991

Absorption of lactose from colon of newborn piglet
R. D. Murray, A. H. Ailabouni, P. A. Powers, H. J. McClung, B. U. K. Li, L. A. Heitlinger, and H. R. Sloan G1

Adenosine is a vasodilator in the intestinal mucosa
D. R. Sawmiller and C. C. Chou G9

Hormonal control of avian pancreas by gastrin-releasing peptide from the proventriculus
B. Campbell, A. Garner, R. Dimaline, and G. J. Dockray G16

Adaptive regulation of brush-border amino acid transport in a chronic excluded jejunal limb
R. M. Salloum, B. R. Stevens, and W. W. Souba G22

Extent and modulation of junctional communication between pancreatic acinar cells in vivo
M. Chanson, L. Orci, and P. Meda G28

Effect of hibernation and jejunal bypass on mucosal structure and function
H. V. Carey and H. J. Cooke G37

Inhibition of muscle cell relaxation by somatostatin: tissue-specific, cAMP-dependent, pertussis toxin-sensitive
L. McHenry, K. S. Murthy, J. R. Grider, and G. M. Makhlouf G45

Link between cell apical morphology and H^+ secretion in salamander small intestine
Q.-C. Yu and J. F. White G50

Binding, internalization, and processing of bombesin by rat pancreatic acini
W.-Y. Zhu, B. Göke, and J. A. Williams G57

Reduced glutathione protects cultured gastric mucosal cells from suckling rats against acid
H. Mutoh, S. Ota, H. Hiraishi, K. J. Ivey, A. Terano, and T. Sugimoto G65

Regulation of intestinal cholecystokinin and somatostatin mRNA by bombesin in rats
S. Kanayama and R. A. Liddle G71

Electrical slow-wave activity from the circular layer of cat terminal antrum
L. M. Renzetti, M. B. Wang, and J. P. Ryan G78

Hepatic transport of a fluorescent stearate derivative: electrochemical driving forces in intact rat liver
J. G. Fitz, N. M. Bass, and R. A. Weisiger G83

Low doses of ethanol have Ca^{2+} ionophore-like effects on apical membrane potential of in vitro *Necturus* antrum
M. J. Rutten and C. D. Moore G92

Vagal stimulation-induced gastric damage in rats
L. E. Hierlihy, J. L. Wallace, and A. V. Ferguson G104

Mechanism of secretagogue-induced HCO_3^- and Cl^- loss from rat parotid acini
S. I. Lee and R. J. Turner G111

Effects of calcium-modifying agents on integrity of rabbit isolated gastric mucosal cells
B. L. Tepperman, S. Y. Tan, and B. J. R. Whittle G119

Mechanism of agonist-induced downregulation of muscarinic receptors in rat pancreatic acini
S. R. Hootman, S. M. Valles, and S. A. Kovalcik G128

Cholinergic and noncholinergic submucosal neurons dilate arterioles in guinea pig colon
S. Vanner and A. Surprenant G136

Radiation and indomethacin effects on morphology, prostaglandins, and motility in dog jejunum
R. W. Summers, C. E. Glenn, A. J. Flatt, and A. Elahmady G145

Effects of hypoxia and ischemia on autoregulation in postnatal intestine
P. T. Nowicki, C. E. Miller, and R. C. Edwards G152

Gastric contractions produce phasic changes in perfusion pressure
J. G. Wood and L. Y. Cheung G158

SPECIAL COMMUNICATIONS

Use of a modified Ussing chamber to monitor intestinal epithelial and smooth muscle functions
Y. F. Li, N. W. Weisbrodt, Y. Harari, and F. G. Moody G166

No. 2. AUGUST 1991

INVITED REVIEW

Can regulatory peptides be regarded as words of a biological language?
E. A. Mayer and J. P. Baldi G171

Glutamine and fatty acid oxidation are the main sources of energy for Kupffer and endothelial cells
Z. Spolarics, C. H. Lang, G. J. Bagby, and J. J. Spitzer G185

Protective actions of a leukotriene B_4 antagonist in splanchnic ischemia and reperfusion in rats
A. Karasawa, J.-P. Guo, X.-L. Ma, P. S. Tsao, and A. M. Lefer G191

Impairment of hepatic insulin receptors during chronic ethanol administration
B. C. Patel, C. D'Arville, M. Iwahashi, and F. R. Simon G199

Electrical characteristics of inward-rectifying K^+ channels in isolated bullfrog oxyntic cells
H. Mieno and G. Kajiyama G206

Microcirculatory disturbance in indomethacin-induced intestinal ulcer
S. Miura, M. Suematsu, S. Tanaka, H. Nagata, S. Houzawa, M. Suzuki, I. Kurose, H. Serizawa, and M. Tsuchiya G213

Stimulatory and inhibitory actions of carbachol on chloride secretory responses in human colonic cell line T84
G. Warhurst, N. B. Higgs, A. Tonge, and L. A. Turnberg G220

Kinetics and regulation of a polarized Na^+-H^+ exchanger from Caco-2 cells, a human intestinal cell line
A. J. M. Watson, S. Levine, M. Donowitz, and M. H. Montrose G229

Effects of glycerol tripalmitate and glycerol trioleate on intestinal absorption of glycerol tristearate
S. E. Bergstedt, J. L. Bergstedt, K. Fujimoto, C. Mansbach, D. Kritchevsky, and P. Tso G239

Relation between postprandial gastric emptying and cutaneous electrogastrogram in primates
S. Bruley des Varannes, M. Mizrahi, and A. Dubois G248

Effect of Pluronic L81, a hydrophobic surfactant, on intestinal mucosal cholesterol homeostasis
C. Pool, D. F. Nutting, W. J. Simmonds, and P. Tso G256

Method for prolonged ambulatory monitoring of high-amplitude propagated contractions from colon
M. D. Crowell, G. Bassotti, L. J. Cheskin, M. M. Schuster, and W. E. Whitehead G263

Developmental expression of intestinal surfactant-like particles in rats
R. Eliakim, M. J. Becich, K. Green, and D. H. Alpers G269

Reflex changes in intestinal tone: relationship to perception
J.-M. Rouillon, F. Azpiroz, and J.-R. Malagelada G280

Increased glucose uptake by intestinal mucosa and muscularis in hypermetabolic sepsis
C. H. Lang, J.-C. A. Obih, G. J. Bagby, J. N. Bagwell, and J. J. Spitzer G287

Gastric acid and pepsin hypersecretion in conscious rabbits
J. S. Redfern, H. J. Lin, K. E. McArthur, M. D. Prince, and M. Feldman G295

A novel transcellular transport pathway for non-bile salt cholephilic organic anions
N. Aoyama, H. Tokumo, T. Ohya, K. Chandler, and R. T. Holzbach G305

Vasopressin and A23187 stimulate phosphorylation of myosin light chain-1 in isolated rat hepatocytes
Y. Yamaguchi, E. Dalle-Molle, and W. G. M. Hardison G312

Gastric HCO_3^- secretion: relationship with Na^+ secretion and effect of acetazolamide in humans
M. Feldman and M. Goldschmiedt G320

Cholinergic regulation of human proximal duodenal mucosal bicarbonate secretion
M. A. Ballesteros, J. D. Wolosin, D. L. Hogan, M. A. Koss, and J. I. Isenberg G327

Misoprostol attenuates acetic acid-induced increases in mucosal permeability and inflammation: role of blood flow
T. Yamada, R. D. Specian, D. N. Granger, T. S. Gaginella, and M. B. Grisham G332

Role of chloride ions in lever cell volume regulation
P. Haddad, J. S. Beck, J. L. Boyer, and J. Graf G340

Hepatic processing of recombinant human renin: mechanisms of uptake and degradation
D. L. Marks, L. J. Kost, S. M. Kuntz, J. C. Romero, and N. F. LaRusso G349

Effects of secretagogues on cytosolic Ca^{2+} levels in rat submandibular granular ducts and acini
I. H. Valdez and R. J. Turner G359

Contraction and accommodation of guinea pig duodenum in vitro
K. Schulze-Delrieu, B. P. Brown, and T. Custer-Hagen G364

LETTERS TO THE EDITOR

Effect of UDCA on intracellular and biliary pH
A. F. Hofmann; M. Strazzabosco and J. L. Boyer G373

No. 3. SEPTEMBER 1991

Myogenic oscillatory mechanism for opossum esophageal smooth muscle contractions
J. F. Helm, S. L. Bro, W. J. Dodds, S. K. Sarna, R. G. Hoffmann, and R. C. Arndorfer G377

Jejunal mucosal injury and restitution: role of hydrolytic products of food digestion
P. R. Kvietys, R. D. Specian, M. B. Grisham, and P. Tso G384

Adrenergic modulation of reactive hyperemia in rat gut
W. W. Pawlik, O. D. Hottenstein, and E. D. Jacobson G392

Nitric oxide: mediator of nonadrenergic noncholinergic responses of opossum esophageal muscle
J. Murray, C. Du, A. Ledlow, J. N. Bates, and J. L. Conklin G401

Electric properties of rat liver cell cultures on gas-permeable membranes
F. Wehner and D. Guth G407

Effect of increased intra-abdominal pressure on peristalsis in feline esophagus
J. Ren, W. J. Dodds, C. J. Martin, R. O. Dantas, R. K. Mittal, S. S. Harrington, M. K. Kern, and J. G. Brasseur G417

α_2-Adrenergic model of gastroparesis: validation with renzapride, a stimulator of motility
G. W. Gullikson, M. A. Virina, R. Loeffler, and W. D. Erwin G426

Comparison of fluid absorption by bovine and ovine descending colon in vitro
A. T. McKie, I. A. Goecke, and R. J. Naftalin G433

Arachidonic acid metabolites and chloride secretion in rabbit distal colonic mucosa
V. Calderaro, A. Giovane, B. De Simone, G. Camussi, R. Rossiello, L. Quagliuolo, L. Servillo, W. Taccone, C. Giordano, and C. Balestrieri G443

Mechanism of arachidonic acid transport across rabbit distal colonic mucosa
V. Calderaro, B. De Simone, A. Giovane, L. Quagliuolo, L. Servillo, C. Giordano, and C. Balestrieri G451

Inhibitory effect of ileal oleate on postprandial motility of the upper gut
Z. Dreznik, D. Brocksmith, T. A. Meininger, and N. J. Soper G458

Functional subtyping of muscarinic receptors on canine esophageal mucosa
R. Lad, B. Donoff, and P. K. Rangachari G464

Role of oxygen-derived free radicals in indomethacin-induced gastric injury
P. M. Vaananen, J. B. Meddings, and J. L. Wallace G470

Inhibition of peptidases potentiates enkephalin-stimulated contraction of gastric muscle cells
D. Menozzi, Z. F. Gu, P. N. Maton, and N. W. Bunnett G476

Pancreatic gene expression is altered during acute experimental pancreatitis in the rat
J.-L. Iovanna, V. Keim, R. Michel, and J.-C. Dagorn G485

Ischemia-reperfusion-induced mucosal dysfunction: role of neutrophils
H. Kurtel, K. Fujimoto, B. J. Zimmerman, D. N. Granger, and P. Tso G490

Fatty acids stereospecifically stimulate neurotensin release and increase $[Ca^{2+}]_i$ in enteric endocrine cells
D. L. Barber, A. M. Cacace, D. T. Raucci, and M. B. Ganz G497

Stimulation of proximal small intestinal mucosal growth by luminal polyamines
J.-Y. Wang, S. A. McCormack, M. J. Viar, and L. R. Johnson G504

Cl^--HCO_3^- exchanger in isolated rat hepatocytes: role in regulation of intracellular pH
A. Benedetti, M. Strazzabosco, J. G. Corasanti, P. Haddad, J. Graf, and J. L. Boyer G512

Ornithine decarboxylase is involved in repair of small intestine after ischemia-reperfusion in rats
K. Fujimoto, D. N. Granger, V. H. Price, and P. Tso G523

Portal transport of absorbed lipids in rats
C. M. Mansbach II, R. F. Dowell, and D. Pritchett G530

Hepatic venular pressures of rats, dogs, and rabbits
H. G. Bohlen, R. Maass-Moreno, and C. F. Rothe G539

In vivo measurement of rat gastric surface cell intracellular pH
K. Kaneko, P. H. Guth, and J. D. Kaunitz G548

RAPID COMMUNICATIONS

Nitric oxide and nitrosocysteine mimic nonadrenergic, noncholinergic hyperpolarization in canine proximal colon
K. D. Thornbury, S. M. Ward, H. H. Dalziel, A. Carl, D. P. Westfall, and K. M. Sanders G553

ANNOUNCEMENTS G558

No. 4. OCTOBER 1991

Secretagogue-specific effects of interleukin-1 on gastric acid secretion
J. L. Wallace, M. Cucala, K. Mugridge, and L. Parente G559

Cholinergic dependence of gallbladder response to cholecystokinin in the guinea pig in vivo
T. Takahashi, D. May, and C. Owyang G565

Potassium transport across basolateral membrane of acinar cells in the perfused rat pancreas
T. Ishikawa and T. Kanno G570

Effects of vasopressor hormones and modulators of protein kinase C on glutathione efflux from perfused rat liver
D. S. Raiford, A. M. Sciuto, and M. C. Mitchell G578

Altered glucose carrier expression: mechanism of intestinal adaptation during streptozocin-induced diabetes in rats
R. N. Fedorak, C. I. Cheeseman, A. B. R. Thomson, and V. M. Porter G585

Characterization of the synergistic interaction of *Escherichia coli* heat-stable toxin and carbachol
S. A. Levine, M. Donowitz, A. J. M. Watson, G. W. G. Sharp, J. K. Crane, and C. S. Weikel G592

$O_2^-\bullet$ release by activated Kupffer cells upon hypoxia-reoxygenation
B. Rymsa, J.-F. Wang, and H. de Groot G602

Nutrient extraction by cold-exposed mice: a test of digestive safety margins
E. M. Toloza, M. Lam, and J. Diamond G608

Gastrin potentiates histamine-stimulated aminopyrine accumulation in isolated rat parietal cells
J. L. Cabero, Z.-Q. Li, and S. Mårdh G621

Endothelin causes prolonged inhibition of nicotinic transmission in feline colonic parasympathetic ganglia
T. Nishimura, J. Krier, and T. Akasu G628

ATP-dependent control of steady-state cytosolic calcium in cultured gastric smooth muscle
R. J. Gilbert, G. Valente, J. T. Deeney, and B. E. Corkey G634

Lipoprotein lipase enables triacylglycerol hydrolysis by perfused newborn rat liver
L. Giménez-Llort, J. Vilanova, N. Škottová, G. Bengtsson-Olivecrona, M. Llobera, and M. Q. Robert G641

Mechanism of changes in hepatic sinusoidal and biliary glutathione efflux with age in rats
M. Ookhtens and T. Maddatu G648

Role of calcitonin gene-related peptide in gastric hyperemic response to intragastric capsaicin
D.-S. Li, H. E. Raybould, E. Quintero, and P. H. Guth G657

Oxygen metabolites stimulate mucous glycoprotein secretion from cultured rat gastric mucous cells
H. Hiraishi, A. Terano, S. Ota, H. Mutoh, T. Sugimoto, M. Razandi, and K. J. Ivey G662

Effects of epidermal growth factor on diamine oxidase expression and cell growth in Caco-2 cells
B. Daniele and A. Quaroni G669

Topography of the esophageal peristaltic pressure wave
R. E. Clouse and A. Staiano G677

Pancreatic microvascular permeability in caerulein-induced acute pancreatitis
J. H. Sweiry and G. E. Mann G685

Evidence for a glutamatergic neural pathway in the myenteric plexus
J. W. Wiley, Y. Lu, and C. Owyang G693

No. 5. NOVEMBER 1991

EDITORIAL REVIEW

Neuropeptide Y and peptide YY: major modulators of gastrointestinal blood flow and function
S. P. Sheikh G701

Adenosine transport in rat liver plasma membrane vesicles
